The Partner Search Tool (PST) is designed to search and find partners for joint research projects between scientists, clinicians or other interested parties in Israel and Saxony. Using this tool will allow you to publish your research interests and look for those of others in order to create grounds for partnerships.

Name of Institute: University Hospital Dresden  
☑ Academic  
☑ Hospital including  
☐ Industry (including SME)  
Country / Region: Saxony, Germany

Summary of research topics:

Pancreatic cancer is still untreatable. We are working on new ways to diagnose and treat pancreatic cancer with modern molecular medicine. This may encompass treatment with new chemotherapy or biologics. Therefore we have established orthotopic mouse models and primary cell lines. To identify targets we have also performed several gene expression analysis studies.

Key Words (5):  
Pancreatic cancer, Therapy, Diagnosis, siRNA

Relevant Publications: (up to 10):
